- Eliminating Data Fragmentation and Splintering.
- Total Data Security, Sovereignty and Upper Hand on Data Leakage and Exposure.
- Global Data Access with Total Data Control.
- Custom Built Environment

# TetherView Background

---

## *A secure and cost effective Private Cloud for business*

TetherView LLC was founded in early 2013 for the purpose of providing Enterprise Class Cloud Services in an affordable offering to the business market space.

TetherView Cloud is a compilation of best of breed solutions made up of top of the line hardware components tightly integrated with proven software fabric to provide the lowest latency virtual platform possible. The platform is housed in redundant compliant SSAE 16, Tier 3 data centers.

Product development enabled TetherView to be softly introduced to the market in 2013 and fully marketed in 2014.

The pillars that support the TetherView Solution are Business Continuity, Cost Containment, Compliance and Unparalleled Security. The thread that binds everything together and makes up the “TetherView Fabric” are Compliancy and Industry Standards.

Today TetherView is unique in the market delivering a turnkey, cost effective Enterprise Business Class Cloud Computing Environment to companies a small as 10 seats and as large as 10,000.

TetherView offers a no risk free trial designed to ensure customer satisfaction.
