

TETHERVIEW SYNC

SECURE FILE SHARE & COMMUNICATIONS

Working faster, securely, collaboratively

Maintain complete control of your shared files with TetherView SYNC™ by simplifying your work with a singular secure location to access and edit documents; allowing businesses to work collaboratively and share data with high level of control.

Evolving Teamwork

We provide a secure workspace for hosting folders and files that can be shared as an attachment or a link inside or outside of your business network.

Users outside of your network can access folders and files only with your consent. You can even share folders or files for a pre-set amount of time or mark viewers as 'read only' only allowing them to view a file and not change content.
