

SECURE YOUR BANK WITH A MANAGED PRIVATE CLOUD

SECURE CLOUD BANKING

Banking service organizations are always on the bleeding edge of technology. The cloud and mobility have provided new opportunities to connect with customers and achieve operational efficiencies. However, data security and compliance are critical to safeguarding pertinent client account information.

The leading Infrastructure as a service solution provider, TetherView, offers banking service organizations a virtual computing environment that is secure, compliant, and can support a broad range of applications.

TetherView virtual workspaces can be accessed via desktops, laptops, tablets and smartphones, enabling bank service professionals to access information from any device and location. Additionally, TetherView can support business continuity initiatives, mitigating the risk of downtime. Within minutes, virtual standby desktops can be activated if/when an outage occurs, ensuring operational uptime.
