

Private Cloud for Accounting Firms

If your Accounting Firm's computer system goes down the organization can recover. But compromised client information can put your company, the clients' trusted advisor, out of business. So If you haven't started talking about cybersecurity in your Accounting Firm, start now.

TetherView is a Private Cloud provider that will allow you to gain full control over your environment and a completely customized solution based on your specific needs. Plus, your costs are highly scalable, much more predictable and far more reasonable. With **TetherView**, security and compliance concerns can be a thing of the past.

We maintain high security standards. Your system is protected by cutting-edge security experts and features. The **TetherView** platform and data centers are AICPA SOC- compliant and have been validated by third party auditors. In addition, you receive full access to comprehensive compliance reporting.

You also get the benefit of virtual desktops, ensuring complete mobility and full-fledged business continuity, ensuring your systems, applications, and data are always accessible, no matter what. Ultimately, with **TetherView** you get a controlled, secured, and centralized environment, all at a price you can afford. You will sleep better at night knowing there are no harmful IT surprises.

EASY TRIAL, NO RISK:

TetherView provides the best contract in the accounting industry. After a client signs and provides a fully refundable deposit, TetherView will build the custom production environment. Prior to going into production, if the client is not satisfied for any reason the client may terminate the agreement and request a full refund of the deposit.
