

CLOUD DESKTOPS

Save your data. Save your world.

FULLY MANAGED VIRTUAL DESKTOPS

Are you tired of managing your Information Technology to ensure appropriate levels of data protection across multiple devices?

TetherView Virtual Desktops are designed to elevate your IT management headaches and provide organizations with military-grade security all while improving employee productivity and computing performance. Our virtual desktops can be accessed from anywhere in the world! All you need is an Internet connection and a device to work from.

TAKE CONTROL OVER YOUR DATA

Consolidate organizational data footprint, enable user activity controls and have full visibility over every file within your environment. The data will be hosted in a custom, private cloud designed specifically for your business. Virus protection, data backups, systems patching and the other mundane but necessary tasks will be handled through TetherView.

EASIEST ROUTE TO THE CLOUD

TetherView will custom-build your new private cloud without any financial obligations - don't like it? No problem! We stand behind our work and provide our clients a truly risk-free onboarding.

Out of 52 included services our clients benefit from, they're only billed for the number of storage utilization (GBs) - so users know what your bill will be every month with no hidden fees.

- ✓ Data Protection
- ✓ Comprehensive
- ✓ High Performing
- ✓ Mobile Compliance
- ✓ No Setup Fees
- ✓ Flat-Rate Pricing
